Re: Park Avenue Street Closure for delivery of HTHW
Generator for SUNY Plattsburgh Central Plant

City Council,

This letter is to request to temporarily close off Park Avenue in the City of Plattsburgh to allow for delivery of a HTHW Generator to SUNY Plattsburgh's Central Plant. The address where the work is to take place is 34 Sanborn Avenue. Due to the size of truck required to deliver the equipment, we will need to block most of Park Avenue during the delivery. We will also need to install some protection along the curbing to allow for delivery truck to back over it to reach the crane pick location. It will be safer to have a full road closure for the time of this work then it would be to have flaggers stopping traffic as needed.

The proposed date and time of the work is September 6th, 2018 from 7:00am until approx. 3:30 pm. Signage will be provide as shown on the attached drawing.

A second closure will be closer to ^{MAY} March 2019 when HTHW #4 is ready for delivery. We anticipate that this will be very similar to the proposed delivery procedure for Generator #3.

Please find the following attached:

- Traffic plan for Road Closure
- Delivery plan showing overhead view of truck path and obstacles
- Street view showing the expected path of the delivery truck
- Cut sheet showing truck with dimensions
- Cut sheet showing Crane with dimensions

The plan for delivery is as follows:

1. Setup road closure signage at beginning of shift on day of delivery
2. Crane to arrive early in the shift or day before and have outriggers set prior to arrival of load.
3. Install plates over catch basin. Install gravel ramp along Park Avenue southern curb in area to the east of the catch basin in order to protect existing curb. Truck to arrive via Sanborn Avenue.
4. Truck to pull forward across Park Avenue to northern side of Sanborn Avenue
5. Truck to back up from Sanborn Avenue to the site between the existing catch basin and pole as shown on the attached sketches.
6. Truck to continue backing into site until in position under crane hook.
7. Load to be rigged and lifted by crane straight up.
8. Truck to pull forward once load is safely lifted out of the way.
9. Truck will exist the area via Sanborn Avenue traveling north.
